

TI DSP Products for the Space Market

ADCSS2009, ESTEC, The Netherlands
Session 3: New Development & Investigation Areas

Yannis Tsikouris -Willgers
Texas Instruments Business Development Manager
Aerospace & Defense End Equipment

Abstract

In this session we will provide an introduction into TI DSP commercial technology and roadmaps which can be brought to the space market to enable advances in space signal processing. TI endeavors to make the latest commercial technology available to the European space community. This will help our European customers choose products that are catalog and export friendly. This overview further illustrates the commitment TI has made to the space market.
